ABOUT US.

Ingenium Co.,Ltd was established since March 2015. We have experience and expertise in bulk solids material handling system and provide LEAN production solutions within various industries. We focus on the complete production process from bulk material handling system, Industrial Sieving and Screening Equipment, High-end Rotary Valves and Diverter Valve, Plastic extrusion System, Pneumatic conveying system, IBC System and production intermittent processes including movement and lifting of goods.

We cover engineering design, manufacturing for stainless and mild steel work, Professional installation service, Commissioning start-up services, and after-sales services.

Ingenium Co.,Ltd projects today range in scope from equipment and accessory sales to complete design and installation of turnkey systems. Our goal is to create a long and successful relationship with our customers to help them achieve improvement of product quality, increase production efficiency and improve labor operations.

5 PILLARS OF OUR BUSINESS

1. Engineering & Consulting Services

- **Process Improvement Consulting Services**
Analyze and optimize production processes for better efficiency.
- **Engineering Design**
3D process concept design and equipment layout integration.

2. Manufacturing & Fabrication

- **Bulk Material Handling Components**
Supply of equipment and components for bulk material handling.
- **Structural Steel Fabrication**
Fabrication of stainless/mild steel structures, silos, hoppers, tanks, and piping.

3. Installation & System integration

- **Installation Service**
Professional installation services for bulk material handling and other systems.
- **Electrical and Control**
PLC programming and operation interface for AB, Siemens, Omron, Mitsubishi, etc.

4. Logistics & Manpower Services

- **Loading and Unloading Labor Services**
Equipment unloading, unpacking, and positioning services.
- **Manpower Supply Services**
Skilled labor supply for installation and commissioning support.

5. After-Sales & Support Services

- **After Sales/Service and Support**
24/7 technical support by skilled technicians.
- **Certified Service Partner**
1st Certified DMN service partner in Southeast Asia

Product Specification

Slimline Range SM 550-FF

Vibratory Check Screener in 550mm Diameter

The 550-FF model can be used as a simple means of check sieving into bins or containers. It is primarily designed to be fed under gravity within new or existing production lines, to screen product into a static weigh bin, big bag, convey line or hopper.

The basic unit will locate within a confined area to provide for retrospective fitting into systems that previously had no sieving equipment. Used with the optional wheeled base assembly, it makes an ideal arrangement to sieve ingredients in small or large batch volumes.

[Explore →](#)

Diverter by DMN-WESTINGHOUSE come in many types and sizes, suitable for a specific use or a variety of applications. The extensive diverter range comprises a series of plug diverters (dual pipe, single pipe, CIP suitable, gravity) and tube diverters (2-14 ports), some of which are also available in USDA Dairy accepted version. For the mineral industry, the BTD ball type diverter with its rugged design is very suitable for handling abrasive products.

ROTARY VALVES

Our rotary valves and diverters have a well-established reputation for being able to handle all kinds of dry powders and granular materials, such as sugar, cocoa, starch, flour, chemical ingredients, lime powder, china clay, fly ash and wood chips. A number of standard rotary valves can be upgraded, depending on the product handled. The housing can be made from Ni-hard casting when working with abrasive products, such as fly ash. Or the inside of the housing can be coated with chromium or tungsten when working with mild abrasive products. What's more, the valve can be fitted with a special rotor when processing sticky products or starch, for example.

CHEMICALS

A world with no processed chemicals at all would present a very inhospitable environment. No

SERVICE & MAINTENANCE

24/7 SUPPORT

DMN-WESTINGHOUSE provides preventive maintenance, for example when it comes to fine-tuning rotor blades and determining tolerances, etc. →

What does this mean for you as a customer?

- ✓ Annual inspection and maintenance
- ✓ 24/7 service, 365 days a year
- ✓ Serviceman within 24 hours on site in case of a defect
- ✓ Advise on increasing the maintenance interval
- ✓ Smaller chance of a production standstill due to breakdowns
- ✓ Also possible with delivery through a retailer
- ✓ Under conditions possible in retroaction

OUR PRODUCT.

BRAMBATI S.p.A.

Brambati specialises in coffee production plants and similar types.

We can supply "turnkey" plants, from the reception of green coffee up to feeding packaging machines, through cleaning, storage, weighing, blending, roasting, conveyance (with either traditional mechanical conveyors or the latest generation of slow conveyors), grinding and degassing.

Our roasters come in a variety of sizes, from 5-7.5Kg/batch (20Kg/h.) to 600Kg/batch (3000Kg/h.). They can be the traditional type (KAR or KAR-S models) or with highly automated design (BR models), allowing for complete flexibility in controlling the coffee roasting process, by adapting the roasting features to the different Customer requirements.

CUSTOMER CARE SERVICE

Brambati specialises in coffee production plants and similar types.

Brambati has introduced a new Customer Care service to provide our customers with quick and efficient assistance worldwide.

Phone line

Our service numbers are

0383 73795 when calling from Italy

+39 0383 73795 when calling from abroad

For quick access to the service, please prepare the following information in advance:

- ✓ Company data
- ✓ Customer code (unique code assigned to each Brambati customer via e-mail)
- ✓ Type of machine/plant with serial number or wiring diagram of reference
- ✓ Contact person to call back
- ✓ Severity of the fault (informational, non-blocking, partially blocking, total block)

OUR PRODUCT.

Vacuum conveyors for bulk powders, granules, and small parts

Piab's vacuum conveying system is a premier powder conveying technology solution. It provides a safe and clean way to handle bulk solids. This includes handling fine dust, abrasive materials, and materials that absorb moisture (hygroscopic) or form bridges. These vacuum powder transfer systems represent an ideal alternative to traditional conveying methods, ensuring no product quality variations while minimizing product loss.

Powder Conveying System for Any Use Case - piFLOW® Vacuum Conveyors by Piab

Piab's vacuum conveying systems lead the industry in powder conveying, delivering versatile and practical solutions for powder conveying applications. Their compact design and unwavering reliability represent the superior choice across diverse sectors. Piab's vacuum conveying systems are optimal powder conveying solutions, offering unparalleled safety and hygiene. Equipped with innovative technology like COAX®, these systems are the epitome of efficiency in vacuum conveying for powder handling. Configurations are straightforward and reliable, using the most energy-efficient way to produce the vacuum. They are available with:

- ✓ ATEX Dust certified, install in zone 21,22
- ✓ ATEX Dust and Gas certified - Conveying granules in explosive dust and gas atmosphere
- ✓ in compliance with FDA
- ✓ with either an ejector-driven vacuum pump or a mechanical pump
- ✓ premium stainless-steel body

The principle

When compressed air (1) passes through the nozzles (2), air is pulled through with the stream of compressed air. Suction will be generated at the opening of each stage (3), resulting in vacuum.

OUR PRODUCT.

Full-stack solution

Full-process services from raw material debagging, silo, dosing, mixing to control systems.
